

## EXPRESSION OF CONCERN

---

# Myricetin exhibits anti-glioma potential by inducing mitochondrial-mediated apoptosis, cell cycle arrest, inhibition of cell migration and ROS generation

Hu-Guang Li<sup>1</sup>, Jun-Xia Chen<sup>1</sup>, Jun-Hui Xiong<sup>2</sup>, Jin-Wei Zhu<sup>1</sup>

<sup>1</sup>Department of Neurosurgery, <sup>2</sup>Department of Rheumatology, LiShui People Hospital, Lishui, Zhejiang 323000, P.R. China

### **Expression of concern to:**

**JBUON 2016;21(1):182-190; PMID: 27061547**

*Following the publication of this article [1], readers drew to our attention that part of the data was possibly unreliable. We sent emails to the authors with a request to provide the raw data to prove the originality, but received no reply. Therefore, as we continue to work through the issues raised, we advise readers to interpret the information presented in the article with due caution. We thank the readers for bringing this matter to our attention. We apologize for any inconvenience it may cause.*
